

Assessments

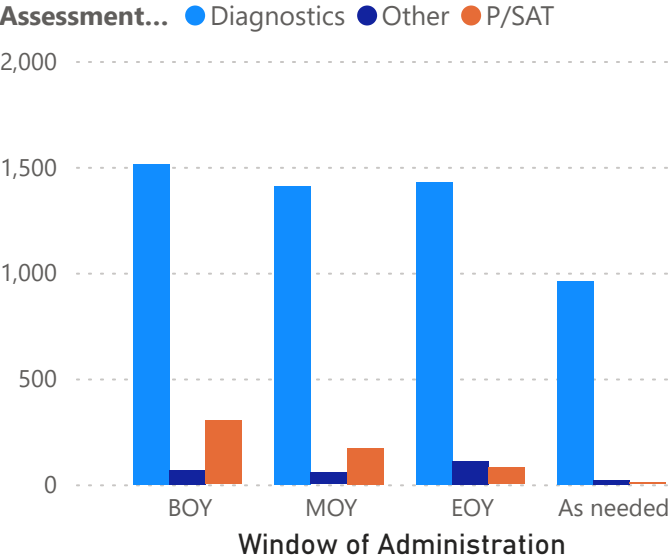

by Grade and Administration Window

The majority of assessments issued are Diagnostics across the year. A large amount of testing is issued as needed, but most is issued at the Beginning of the Year.

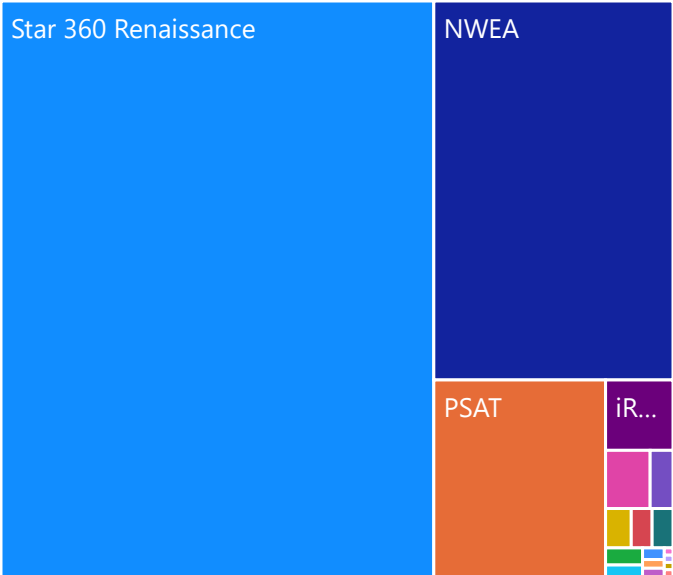

Most assessments are done using Star 360, NWEA, and PSAT.

Diagnostic tests are issued most from grades K-8 with a peak in 3rd grade, but High School sees a decrease in Diagnostic testing and a rise in PSAT testing. This makes sense because those are official tests used for college entrance.

Assessment Types for Grades 9-12

Assessments By School

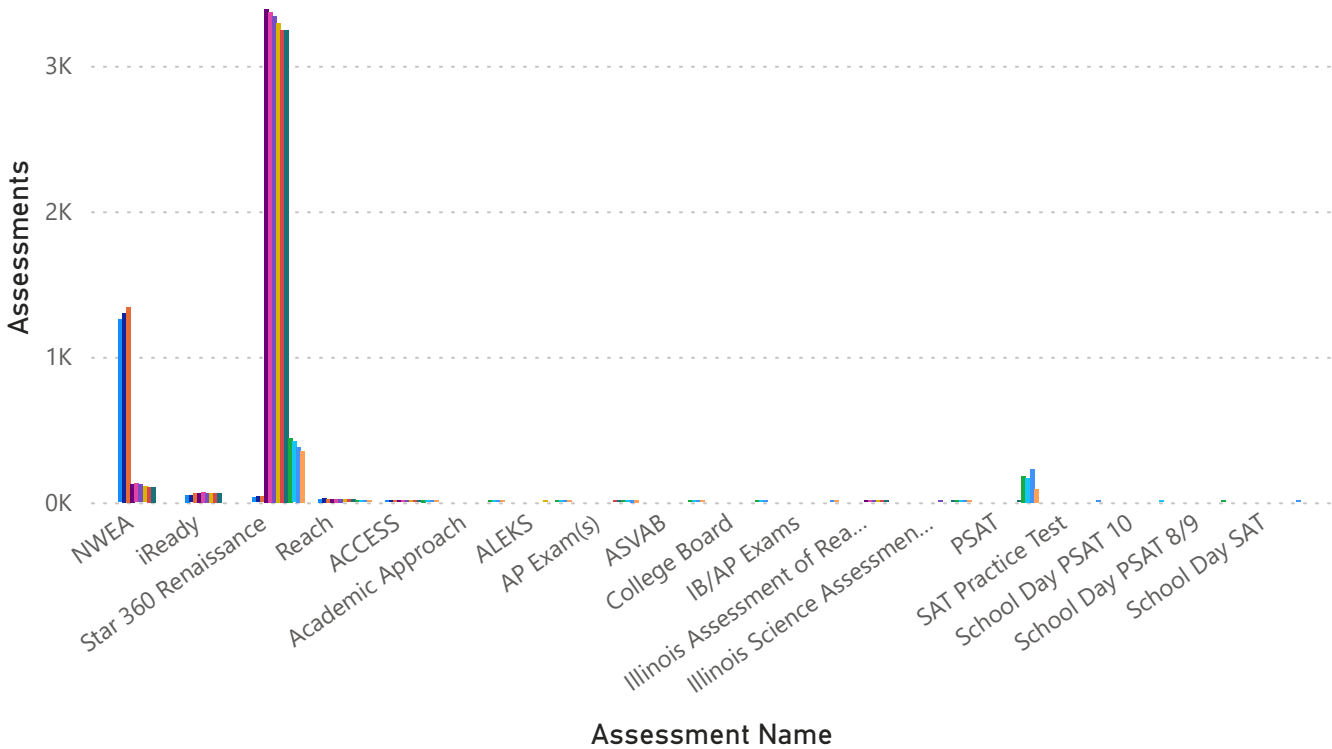

Choose the school from a drop down window. The pie chart will show the proportion of assessments administered. Below, we can see the grade levels tested at that school (Albany Park, for example, is a middle school - we can see that they only test 7th & 8th grades). We can also see when they administer these tests.
